Precision is your top priority. We provide it.
The moment you inspire your customers with technology from ZEISS. This is the moment we work for.
We address your wishes on a personal and individual basis and focus on the benefits we can offer you. With our expert knowledge we efficiently support the product generation process for highly advanced optical components. You can also benefit from the experience of our in-house tool and measuring technology development departments.

Technical competence is vital for successful project completion. We possess the experience and methods to carry out complex projects successfully. You decide to what extent you wish to be involved. By applying our specialist and design competence, we develop unique and customized optical systems.

Modern machines, testing equipment and production technologies together with our employees’ know-how ensure that we can fulfill your requirements from prototype construction right up to batch production.

The ZEISS brand stands for precision, quality, innovation and reliability. Efficient structures and years of experience in development and production have been contributing to our customer’s success for decades. The perfect interplay between design and production of optical and mechanical systems all under one roof makes us attractive to our customers and ensures competitive solutions.

We are a global player with facilities in Jena, Oberkochen in Germany and Minsk in Belarus. Our internationally-oriented sourcing and partner network provides support over the entire value-adding process.
To fulfill your demands: Our portfolio of products and services

Do you have an idea and need a partner to engineer and develop in accordance with your needs? Are you looking for precise manufacturing that surpasses your own in-house capabilities? Does time matter to you and it is crucial to get a prototype developed and built right up in time for the production stage?

Or are you looking for a reliable partner for your serial production?

We combine technological know-how, engineering competence and manufacturing capabilities under one roof to provide continuous support from the idea to batch production.

Your requirements, as well as Design to Cost and Design to Manufacture are our main focus.

In everything we do, the customer is our priority.

Designing optical systems
- Development and design of opto-mechanical components, modules and systems
- Simulation and improvement
- Consulting and project management

Optical components
- Single, highly precise optical components
- Aspheres
- Freeform surfaces
- Complex coatings
- Microoptics

Mechanical components
- Broad technological capabilities across all manufacturing methods
- Surface finishing
- Precision machining
- Special techniques

Opto-mechanical systems
- Mounting of optics
- Module and system assembly and alignment, in clean rooms if necessary
- Function testing and system measurements

Services
- Automation solutions
- Development and building of tools, handling systems and other operating equipment
- Accredited quality and test center/calibration services
- Chemical auxiliary materials and supplies
Your satisfaction is our top priority

It is not only in-time delivery, quality and technical performance that count. Our policy is having you in focus in everything we do. The following values form the foundation on which this goal is achieved:

- Your personal expectations and requirements are our main focus.
- Through personal consulting we tell you openly if something cannot be implemented and help you realize even critical ideas.
- In accordance with your requirements, processes will be defined and optimized in a flexible manner.
- You will get a reliable partner in the long term.
- Challenges are appreciated as a motivation. To find the optimum answer or solution to your requirements we use our full spectrum of know-how and creativity.

Fascinating markets with demanding customers

As a subsidiary of Carl Zeiss AG, Carl Zeiss Jena GmbH is both indirectly and, in many cases, directly represented in a large number of industries. All over the world, customers put their trust in our quality and precision:

- Semiconductor industry
- Medical equipment
- Microscopy
- Mechanical engineering
- Photography and sports optics
- Research and development
- Aerospace industry

Do you need expert advice and manufacturing support, or do you require a quotation for a concrete project? Get in touch with our experts.

**Jena Sales Office:**
Carl-Zeiss-Promenade 10,
07745 Jena
Telefon: +49 (0) 36 41 64 26 46

**Oberkochen Sales Office:**
Carl-Zeiss-Straße,
73447 Oberkochen
Telefon: +49 (0) 73 64 20 32 02
