Foldable Tube f170/f260
An Ergonomic Breakthrough
An Ergonomic Breakthrough

The Foldable Tube f170/f260 combines brilliant apochromatic optics and a unique design for maximum visualization flexibility, magnification potential and positioning adaptability. It allows surgeons a wide range of comfortable working positions, even at extreme surgical approach angles.
Greater Comfort

The Foldable Tube f170/f260 introduces a high level of comfort:

- **Rotate the tube easily** without moving the microscope head using the integrated 360° rotation function. No need for external rotating adapters reducing microscope head build height.

- **Work ergonomically** by reducing or increasing the distance to the required treatment field thanks to the patented multi-link design.

- **Easily compensate for eye level differences** between the surgeon and the assistant when operating in a face-to-face configuration by simply rotating the tube.

The Foldable Tube f170/f260 can be combined with most OPMI® surgical microscopes from Carl Zeiss.

Greater Detail

Apochromatic optics from Carl Zeiss offer surgeons outstanding visual clarity:

- **Instantly yield a 50% magnification gain** for delicate and detailed procedures with the integrated PROMAG™ function.

- **Choose between optimum magnification and maximum field of view** with a quick turn of the knob.
