Z-HYALIN plus
The all-around cohesive OVD.
The moment you don’t have to give your OVD a second thought. This is the moment we work for.
Z-HYALIN® plus – the all-around cohesive OVD

Z-HYALIN® plus is designed to meet all expectations for an all-around OVD. It supports you for every step and every type of cataract surgery.

**High-end simplicity**

- Outstanding cohesive behavior
- OVD for every surgical need
- Flexibility of a high volume syringe (1.0 ml)
Modern OVDs are extremely important in determining the success of surgery. However, there are more important aspects which you have to focus on during surgery. One of our major goals has been to develop OVDs where you never have to give it a second thought.

- ZEISS OVDs are the result of more than 25 years of experience in the development and production of unique OVDs with the excellent quality standard associated with Carl Zeiss

- ZEISS OVDs originate exclusively from patented continuous biofermentation and are therefore not based on animal tissue

- As ZEISS OVDs and IOL technology come from one experienced source, the products are perfectly aligned with one another

- Carl Zeiss provides a whole range of innovative OVDs – the right product solution for every surgery – no matter whether unique, standard or premium viscosurgical tools are needed

- Highly dedicated Carl Zeiss employees in R & D labs and state-of-the-art production facilities give their very best so that you can totally trust the quality of their work

*That’s why ZEISS OVDs are “Engineered for simplicity”.*
A concept that meets surgeons’ demands

Z-HYALIN plus is the most versatile single viscosity OVD designed for every surgical need.

“Z-HYALIN plus allows very good creation and maintaining of volumes… It fulfills all the specific requirements of the surgery through microincision.”

Dr. Danielle DEIDIER, MD
Saint Vincent Clinic, Toulon, France

“It’s the ideal OVD for routine cataract surgery.”

Dr. Alessandro GALAN, MD
Direttore Unità Operativa Complessa Ospedale S. Antonio, Padova, Italy

“It’s a very good all-around OVD.”

Dr. Fulvio BERGAMINI, MD
Head of Ophthalmology Dpt,
Istituto Auxologico di Milano, Italy
The moment innovation and passion lead to the best vision for your patients.

This is the moment we work for.
Multiple requirements – one solution

- Ease of use in any case
- Proven endothelium protection
- Highly effective in space creating
- Optimal chamber retention
- Good capsular bag inflation
- Quick and easy removal
- Optimum safety thanks to ZEISS quality standard
- Available in single box and multipack of 10 syringes

Z-HYALIN plus cohesive OVD consists of a 1.5% solution of sodium hyaluronate derived from bacterial fermentation (nothing of animal origin) that has a high molecular weight and a high viscosity. The 1.0 ml volume of high viscosity cohesive OVD offers high flexibility of use.

We respect nature. Our OVDs do not contain animal tissue.
